

Research Student Information

Name	Mr. Guilherme Riccioppo MAGACHO	
PhD Title	Complementarity between exports and domestic market in Latin America's recent growth	
Project information	Focusing on Latin America's potential economic development in a long term perspective, the aim of the project is to identify the sources of growth among Latin American's main economies in the 2000s, as well as to compare their distinct experiences during this process. The study intends to analyse, on the one hand, the importance of exports in creating effective demand and reducing the balance of payment constrains and, on the other hand, the relevance of income redistribution and public investments as demand drivers. In this context, the central thesis of this work is that in many Latin American countries – such as Brazil, Mexico and Argentina – the domestic market have been playing a central role in boosting the effective demand, even though exports have come to be essential in reducing the balance-of-payment constrains. Therefore, this research focuses on the complementary relationship between exports and domestic market in Latin American countries' process of accumulation in the last decade.

Brazilian - 28 years old

Formal Education/Degree

2012 Ph.D. in progress in Land Economy.
University of Cambridge, CAM, United Kingdom.
Supervisor: John McCombie. Grantee of: Coordenação de Aperfeiçoamento de Pessoal de Nível Superior (CAPES).

2009 - 2012 Master's in Economic Theory.
State University of Campinas, UNICAMP, Brazil. Year of degree: 2012.
Supervisor: Mariano Francisco Laplane.
Keywords: capital goods industry, balance-of-payments constraint, technological dependence.

2004 - 2008 Graduation in Economics.
University of Sao Paulo (USP), Brazil.
Supervisor: Fabiana Fontes Rocha.

Complementary Education

2012 - 2012 Input-Output Analysis: Concepts and application. (Hours: 6h).
University of São Paulo (USP), Brazil.

2012 - 2012 Efficiency of Public Spending and Economic Development (Hours: 6h).
University of São Paulo (USP), Brazil.

2011 - 2011 Agent-based models (Hours: 56h).
State University of Campinas (UNICAMP), Brazil.

Current Research

Title: Complementarity between exports and domestic market in Latin America's recent growth
Supervisor: John McCombie

Focusing on Latin America's potential economic development in a long term perspective, the aim of the project is to identify the sources of growth among Latin American's main economies in the 2000s, as well as to compare their distinct experiences during this process. The study

intends to analyse, on the one hand, the importance of exports in creating effective demand and reducing the balance of payment constrains and, on the other hand, the relevance of income redistribution and public investments as demand drivers. In this context, the central thesis of this work is that in many Latin American countries – such as Brazil, Mexico and Argentina – the domestic market have been playing a central role in boosting the effective demand, even though exports have come to be essential in reducing the balance-of-payment constrains. Therefore, this research focuses on the complementary relationship between exports and domestic market in Latin American countries' process of accumulation in the last decade.

Professional Experience

São Paulo State Manufacturing Federation, Sao Paulo, Brazil

(Federação das Indústrias do Estado de São Paulo)

2009 - 2012 Project Analyst, Exclusive Dedication, 38h / week.

2008 - 2009 Research Assistant, Exclusive Dedication, 38h / week.

2006 - 2008 Trainee, 25h / week.
