George Katsibokis

Architectural-Engineering-Construction

Project 360° AEC Consultants

George Katsibokis, is an Architectural-Engineering-Construction (AEC) professional with experience of twenty-four years in the design and realisation of projects for the built environment. He has worked as a project manager and consultant in Europe, Asia and the UK leading interdisciplinary, multicultural teams across a wide range of projects of varying complexity and size. He helps contractors work smarter and clients add value to projects, by offering expert advice, leading project teams proactively, from inception to handover.

In his last role George worked for the University of Cambridge as the client-side project manager of Lots 1 & 3 (£100m) in North West Cambridge Development (now Eddington), leading the consultant and contractor teams in the design, procurement and delivery of this mixed-use estate. In parallel, he served as the project's BIM Lead.

Currently, George is the Managing Director of Project 360°, an interdisciplinary consultancy that offers expert services regarding the design and delivery of projects for the built environment. Typical projects include high-end developments of outstanding architectural value, B2B services for the implementation of change in built environment-related businesses (consultants, developers, contractors), as well as project management services.

George conducts independent research regarding the digitalisation of construction procedures. He is a Civil & Structural Engineer by profession, holds two Master's degrees, from Imperial College (Civ.Eng.) and Cambridge (Arch.), and is a Member of ICE, a Chartered Engineer, as well as an affiliate member of RIBA. He is passionate about architecture, the digitisation of the AEC industry and the role heritage plays in the creation of places and spaces.
